

# COVID19 POLICY

## RECOMMENDATIONS FOR

## CALADAN

Team 8 - Grace Chong, Amelia Jennings,  
Namita Rajasubramanian, Neri Ajiatas Arreaga

## Problem

Caladan is a midsize commonwealth with a population of 3.2 million, featuring two major urban centers, Duncan and Stillgard. The leaders of Caladan are concerned about the impact of the virus and are seeking effective policies to mitigate its spread while keeping the economy as unrestricted as possible.

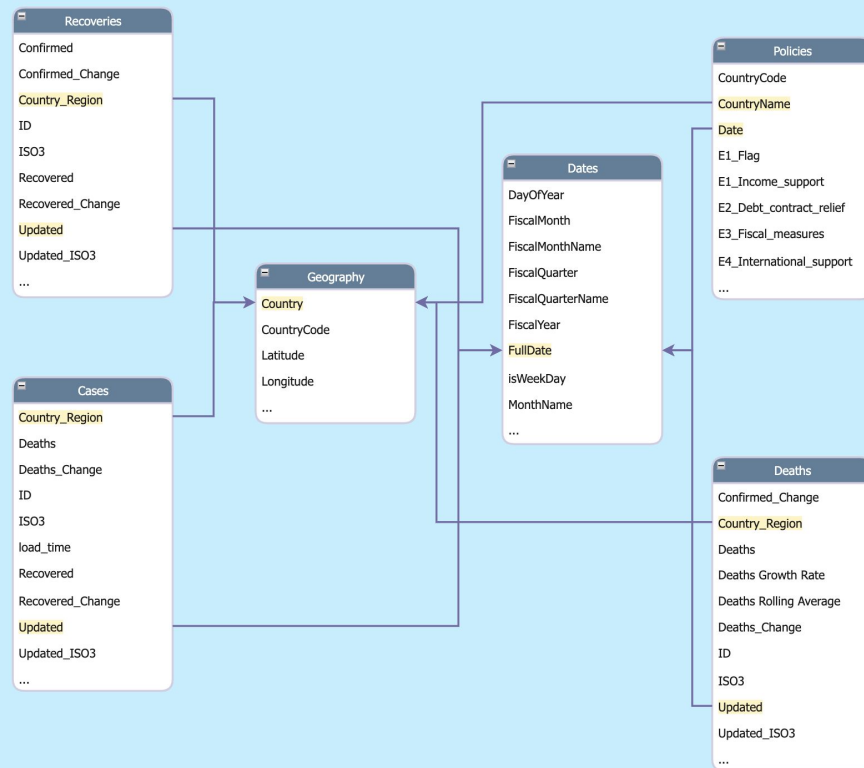

## Goals

Help Caladan's government leaders determine the most effective, minimally restrictive policies that can keep the growth rate of COVID-19 deaths below 1% and the growth rate of new cases below 3% on a 30-day rolling average.

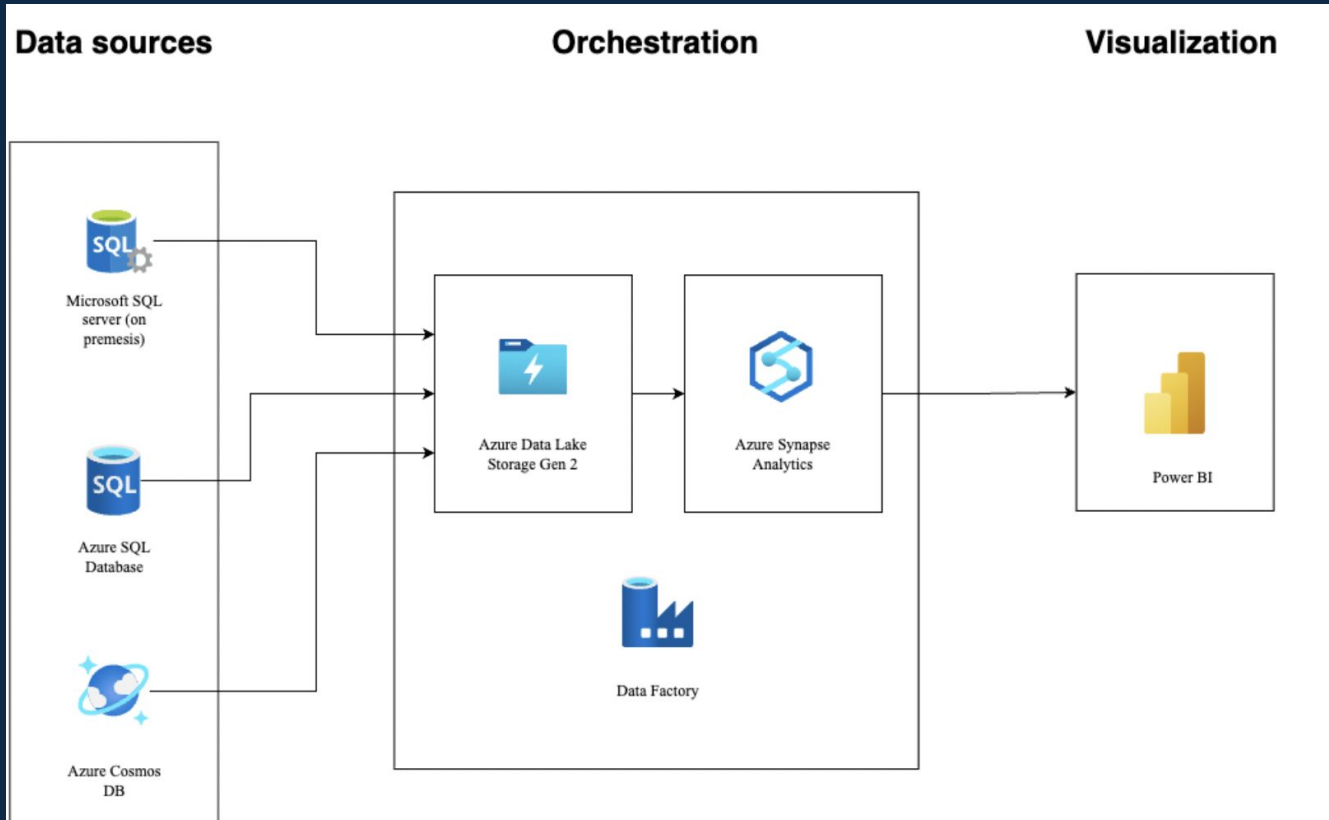

## Approach

Utilized a linear regression model to examine the relationship between the policies and the death growth rates/cases growth rates

- ☐ C8\_International\_travel\_co...

Sum of Deaths Growth Rate by Year, Quarter, Month, Day and C6\_Stay\_at\_home\_requirements

C6\_Stay\_at\_home\_requirements 0 1 2 3

Sum of Cases Growth Rate by Year, Quarter, Month, Day and C6\_Stay\_at\_home\_requirements

C6\_Stay\_at\_home\_requirements 0 1 2 3

# Confirmatory Data Analysis

Two linear regression models were created to learn the relationship between the policies and the death growth rates and the coefficients corresponding to each policy were ranked to obtain the order of the policies with the most significant impact. We narrowed down 4 policies that overlapped as most significant for both growth rates.

# Policy Recommendations

## Stay at Home

### Level 1

This policy recommends that all citizens remain at home, with exceptions only for daily exercise, grocery shopping, and trips deemed 'essential.'

## Facial Coverings

### Level 2

This policy mandates all individuals to wear facial coverings in all indoor and outdoor spaces

## Cancel Public Transportation

### Level 1

This policy significantly reduces the volume, routes, and means of transportation available.

## Cancel Public Gatherings

### Level 2

This policy mandates the cancellation of all public events to prevent large gatherings.
